

ACCEPTABLE USE POLICY FOR PUBLIC & GUEST WIFI

CMAXX WiFi Solutions Acceptable Use Policy for Public & Guest WiFi

Effective Date: 1 July 2026

Website: www.cmxxwifisolutions.co.za

Company: CMAXX WiFi Solutions

Email: info@cmxxwifisolutions.co.za

Phone: 010 140 3660

1. Introduction

This Acceptable Use Policy explains the rules for using Public & Guest WiFi networks provided, managed, configured, supported, or maintained by CMAXX WiFi Solutions for clients, venues, businesses, events, public access locations, or similar environments.

By connecting to a Public & Guest WiFi network, using a voucher, accepting captive portal terms, or accessing the internet through a guest network, you agree to use the network lawfully, responsibly, and in accordance with this policy.

2. Purpose of this Policy

The purpose of this policy is to protect the network, users, client venues, business owners, staff, visitors, customers, guests, CMAXX, and third parties from unlawful, harmful, abusive, disruptive, or unsafe use of Public & Guest WiFi services.

3. Who this Policy Applies To

This policy applies to guest WiFi users, voucher users, visitors, staff, customers, event users, client-provided access users, public hotspot users, venue users, contractors, and any other person who accesses a Public & Guest WiFi network managed, configured, supported, or maintained by CMAXX.

4. CMAXX's Role

Depending on the arrangement, CMAXX may act as a managed network provider, service provider, support provider, operator, technical administrator, or network support partner.

The client, venue, business owner, event organiser, property owner, or organisation providing access to users may also have responsibilities relating to privacy, signage, acceptable use, employee use, visitor access, customer communication, and lawful use of the network.

5. Lawful and Responsible Use

Users must use the network lawfully, responsibly, respectfully, and in a way that does not harm the network, other users, the venue, the client, CMAXX, or third parties.

Users must comply with all applicable South African laws and any reasonable instructions, notices, access rules, venue rules, voucher rules, or captive portal terms.

6. Prohibited Activities

Users may not use the network for illegal, harmful, abusive, fraudulent, or disruptive activities.

Prohibited activities include, but are not limited to:

Illegal content, unlawful downloads, copyright infringement, hacking, unauthorised access, malware, viruses, phishing, spam, fraud, identity theft, harassment, abuse, threats, hate speech, exploitation, network scanning, denial-of-service activity, interference with other users, interference with network equipment, attempts to bypass security, attempts to bypass voucher limits, attempts to bypass time limits, attempts to bypass data limits, attempts to bypass access controls, attempts to bypass filtering, attempts to bypass captive portals, or attempts to interfere with network restrictions.

7. Fair Usage

Guest WiFi access may be subject to fair usage controls.

These may include bandwidth limits, data limits, time limits, speed limits, content restrictions, session limits, voucher limits, device limits, access schedules, or other reasonable network management controls.

CMAXX and/or the client, venue, or business owner may apply these controls to manage network performance, protect other users, reduce abuse, and maintain a reliable service.

8. Network Monitoring

The network may be monitored for security, performance, troubleshooting, support, abuse prevention, access management, reporting, and service improvement.

Monitoring may include guest access records, voucher access records, session information, device-related information, usage analytics, network performance information, support logs, security logs, and abuse-prevention information.

For more information about privacy and personal information, users should read the applicable Privacy Policy & POPIA Notice or captive portal privacy notice.

9. No Guarantee of Uninterrupted Access

Public & Guest WiFi is provided on an “as available” basis unless otherwise agreed in writing with the client or venue.

CMAXX does not guarantee uninterrupted access, specific speeds, specific coverage, specific availability, compatibility with every device, or access to every website, app, platform, or online service.

Access may be affected by internet provider performance, power availability, signal strength, network congestion, device limitations, technical faults, voucher limits, fair usage rules, venue policies, maintenance, or third-party outages.

10. Public WiFi Security Warning

Public and guest WiFi networks may carry security risks.

Users are responsible for protecting their own devices, passwords, accounts, personal information, browsing activity, and online security.

Users should avoid entering sensitive information on unsafe websites, use secure websites where possible, keep devices updated, use appropriate security software, and avoid sharing passwords or confidential information over insecure channels.

11. User Responsibility

Users are responsible for their own devices, online accounts, browsing activity, downloads, uploads, passwords, software, security settings, and use of the network.

Users must not allow others to misuse their device, voucher, login, or access session.

Users remain responsible for any activity conducted through their device or access session.

12. Client, Venue, or Business Owner Responsibilities

Where Public & Guest WiFi is provided at a client site, venue, business, event, public access location, guest house, restaurant, retail space, office, or similar environment, the client, venue, or business owner may be responsible for appropriate notices, signage, privacy communication, employee communication, visitor communication, customer communication, access conditions, and compliance with applicable laws.

The client or venue may also decide whether to apply voucher controls, access limits, time limits, data limits, content controls, user restrictions, or other access rules.

13. Right to Suspend, Restrict, or Terminate Access

CMAXX and/or the client, venue, or business owner may suspend, restrict, block, limit, or terminate access where a user breaches this policy, misuses the network, attempts to bypass controls, creates security risks, disrupts other users, exceeds fair usage limits, violates applicable laws, or causes technical, legal, reputational, or operational risk.

Access may also be suspended or limited for maintenance, troubleshooting, performance management, abuse prevention, or security reasons.

14. Privacy and POPIA Reference

Use of Public & Guest WiFi may involve the processing of personal information, access records, voucher information, device-related information, usage analytics, network performance information, support logs, security logs, and abuse-prevention information.

Users should read the applicable Privacy Policy & POPIA Notice before using the network.

15. Suggested Captive Portal Acceptance Wording

Recommended captive portal wording:

“By connecting to this WiFi network, you agree to use the service lawfully and responsibly. Your access may be subject to fair usage limits, security monitoring, network performance monitoring, and the Acceptable Use Policy. Public WiFi may not be fully secure, and you remain responsible for your own device, accounts, passwords, and browsing activity. Please read the Privacy Policy and Acceptable Use Policy before continuing.”

Button wording:

“I Accept and Connect”

16. Contact Details

For questions about this policy, please contact:

CMAXX WiFi Solutions

Email: info@cmaxxwifisolutions.co.za

Phone: 010 140 3660

Website: www.cmaxxwifisolutions.co.za

Where the WiFi is provided by a client, venue, event, business, or property owner, users may also need to contact that venue or business directly.

17. Legal Review Disclaimer

This Acceptable Use Policy for Public & Guest WiFi is a draft website and captive portal policy prepared for general business and compliance communication purposes. It is not legal advice and should not be treated as a final legal document. CMAXX WiFi Solutions should have this policy reviewed by a qualified South African legal, privacy, or compliance professional before publication.
