

FISANTEKRAAL HIGH SCHOOL
ANNUAL TEACHING PLAN – WEEKLY CODES

2026 · Term 2

FORM CODE

SA-05

TERM ATP WEEKLY PLAN

SA05-P1

Academic year:

2026

Grade:

8

Subject:

Mathematics

No. of weeks:

10

Copy this week's ATP code into Section C of SA-02, then tick Completed or Not completed.

Week 1

MT2A

Algebraic expressions: like and unlike terms; add and subtract terms; multiply a monomial by a binomial or trinomial.

Week 6

MT2F

Construction of geometric figures: construct triangles and quadrilaterals; investigate their properties.

Week 2

MT2B

Algebraic expressions: divide polynomials by a monomial; squares, cubes, square roots and cube roots of terms.

Week 7

MT2G

Geometry of 2D shapes: classify triangles and quadrilaterals by sides and angles; congruent triangles.

Week 3

MT2C

Algebraic equations: solve equations by inspection, trial and improvement, and additive and multiplicative inverses.

Week 8

MT2H

Geometry of 2D shapes: similar triangles; solve problems using the properties of triangles and quadrilaterals.

Week 4

MT2D

Algebraic equations: equations with brackets and exponents; set up and solve equations from word problems.

Week 9

MT2J

Geometry of straight lines: angle pairs; angles formed by parallel lines cut by a transversal.

Week 5

MT2E

Construction of geometric figures: bisect lines and angles; construct perpendicular lines and 30° , 45° , 60° angles.

Week 10

MT2K

Revision and assessment: consolidate Term 2 topics; write the formal Term 2 controlled test.

ATP codes are provisional and will be replaced with the final coding scheme.
